EARLY GAME MARKET SIGNALS

RESIDENT EVIL REQUIEM

ANALYZING EARLY PUBLIC INTEREST AND PLAYER ENGAGEMENT FOR RESIDENT EVIL REQUIEM IN COMPARISON TO PREVIOUS RESIDENT EVIL TITLES

START

DATA SOURCES

3 DIFFERENT TYPES OF DATA SOURCES!

SOURCE	DATA	PURPOSE
GOOGLE TRENDS	Search interest over time, peak values, and time series trends ~90 daily data points per game	Measure public attention and hype
STEAM REVIEWS	Total reviews, positive/negative review counts, and review score. Data collected for 5 games	Measure player engagement and reception
STEAM METADATA	Release date, recommendations, and game info. Data collected for 5 games	Provide context and support comparison across titles

FEATURE DEFINITIONS

Feature	Description	How it Was Measured
Search Interest Over Time	Tracks how public interest in each game changes over time	Time series data collected from Google Trends using pytrends
Peak Search Interest	The highest level of search activity reached by a game in the selected timeframe	Maximum value from Google Trends data (0-100 scale)
Average Early Search Interest	The average search interest during the first two weeks after release	Mean of the first 14 days of Google Trends data
Total Reviews	The total number of user reviews on Steam, representing player engagement	Retrieved from Steam API review summary (total_reviews)
Positive Review Percentage	The percentage of reviews that are positive, indicating player satisfaction	Calculated as (positive reviews / total reviews) * 100

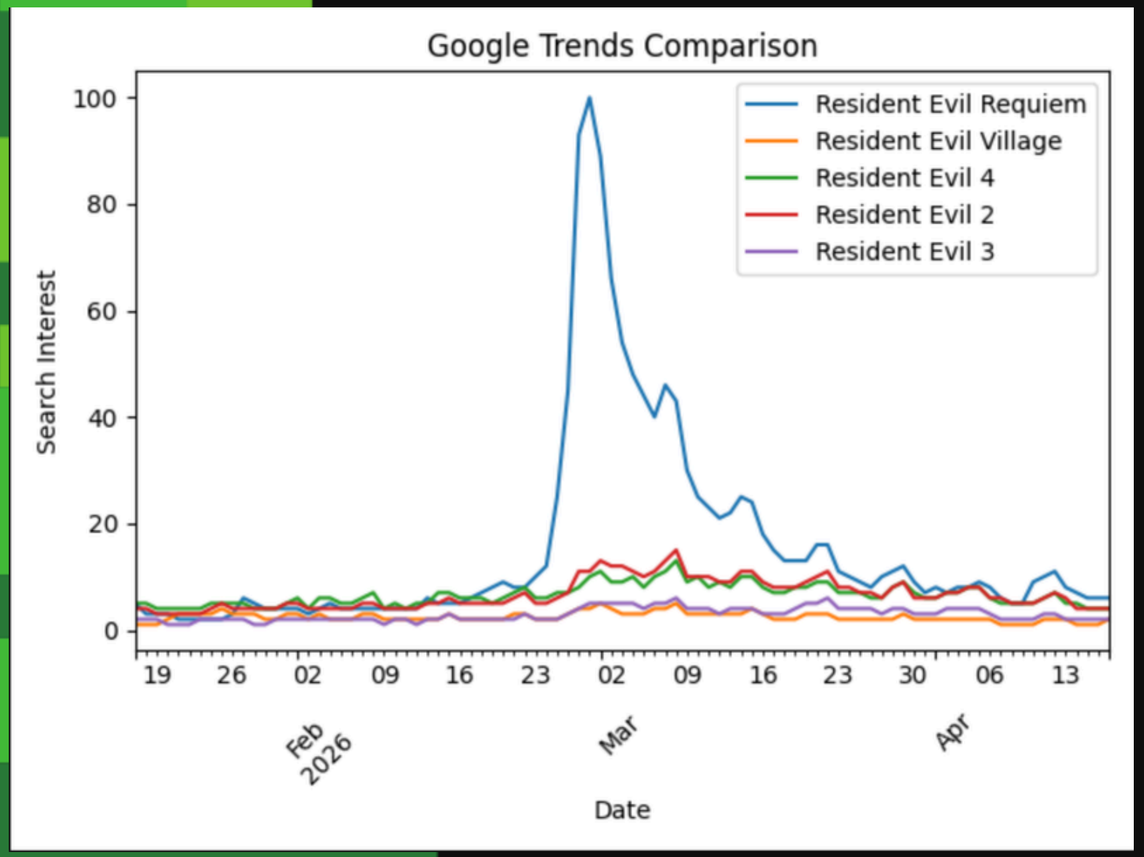
SUMMARY OF RESULTS

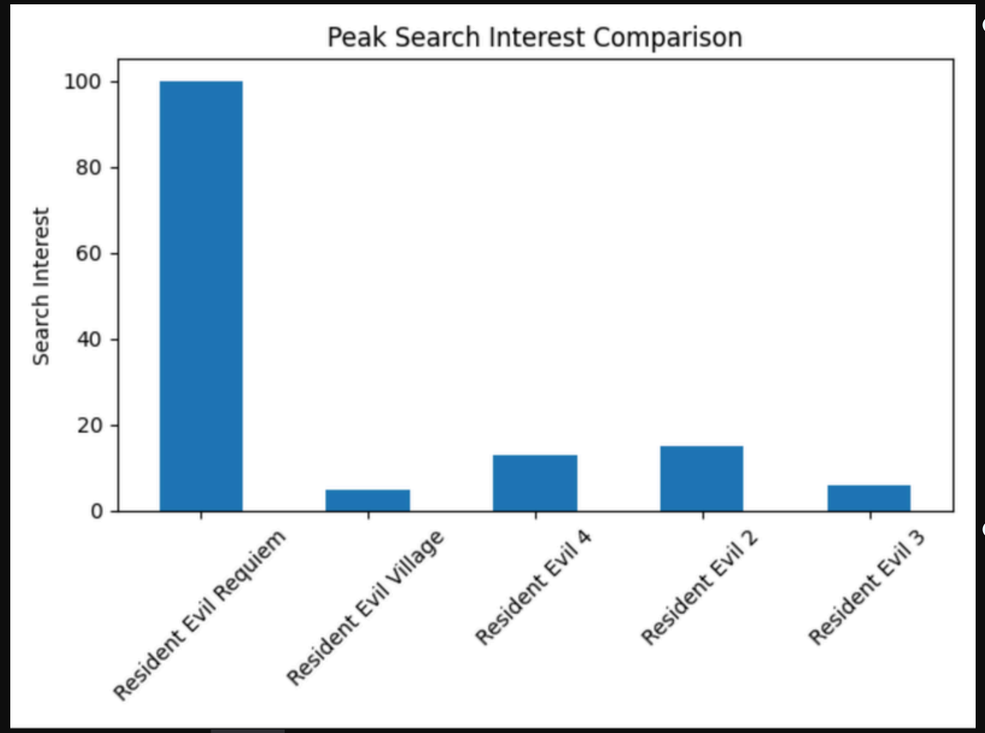
SEARCH INTEREST OVER TIME

- RESIDENT EVIL REQUIEM SHOWS A SHARP SPIKE WHEN THE GAME WAS LAUNCHED.
- YOU CAN EVEN SEE THAT SOME OF THE GAMES ALSO HAD A LITTLE SPIKE IN BETWEEN THE HYPE OF REQUIEM.
- OTHER TITLES REMAINED RELATIVELY STABLE.

THIS INDICATES A STRONG INITIAL PUBLIC ATTENTION FOR THE NEW RELEASE!



PEAK SEARCH INTEREST COMPARISON



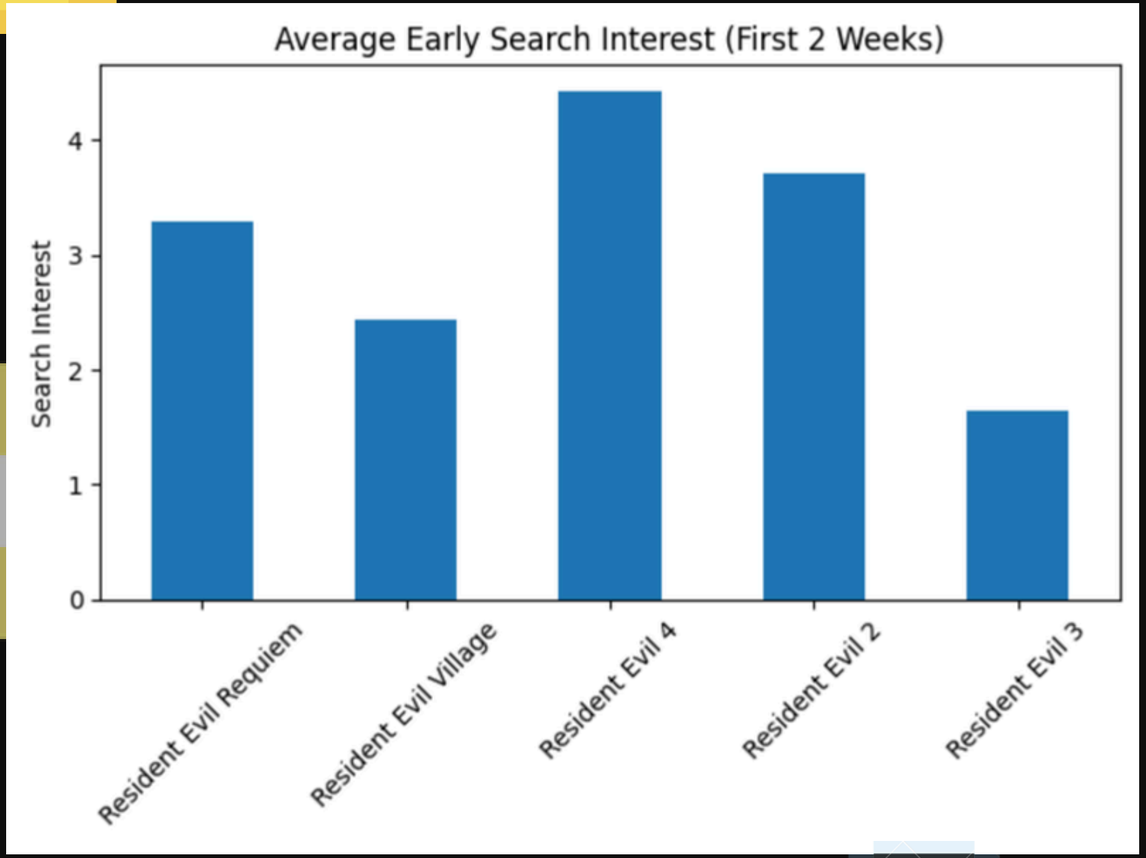
- REQUIEM REACHED THE HIGHEST PEAK AMONG ALL THE TITLES (MAXIMUM OF 100).
  - GOOGLE VALUE TRENDS ARE NORMALIZED, SO A VALUE OF 100 SIGNIFIES THE HIGHEST LEVEL OF SEARCH INTEREST WITHIN THE SELECTED TIMEFRAME, RATHER THAN AN ABSOLUTE NUMBER OF SEARCHES.
- THE REST OF THEM HAVE MUCH LOWER VALUES IN COMPARISON TO REQUIEM.

THIS INDICATES THE STRONGEST LAUNCH-RELATED HYPE TOWARDS THE GAME.

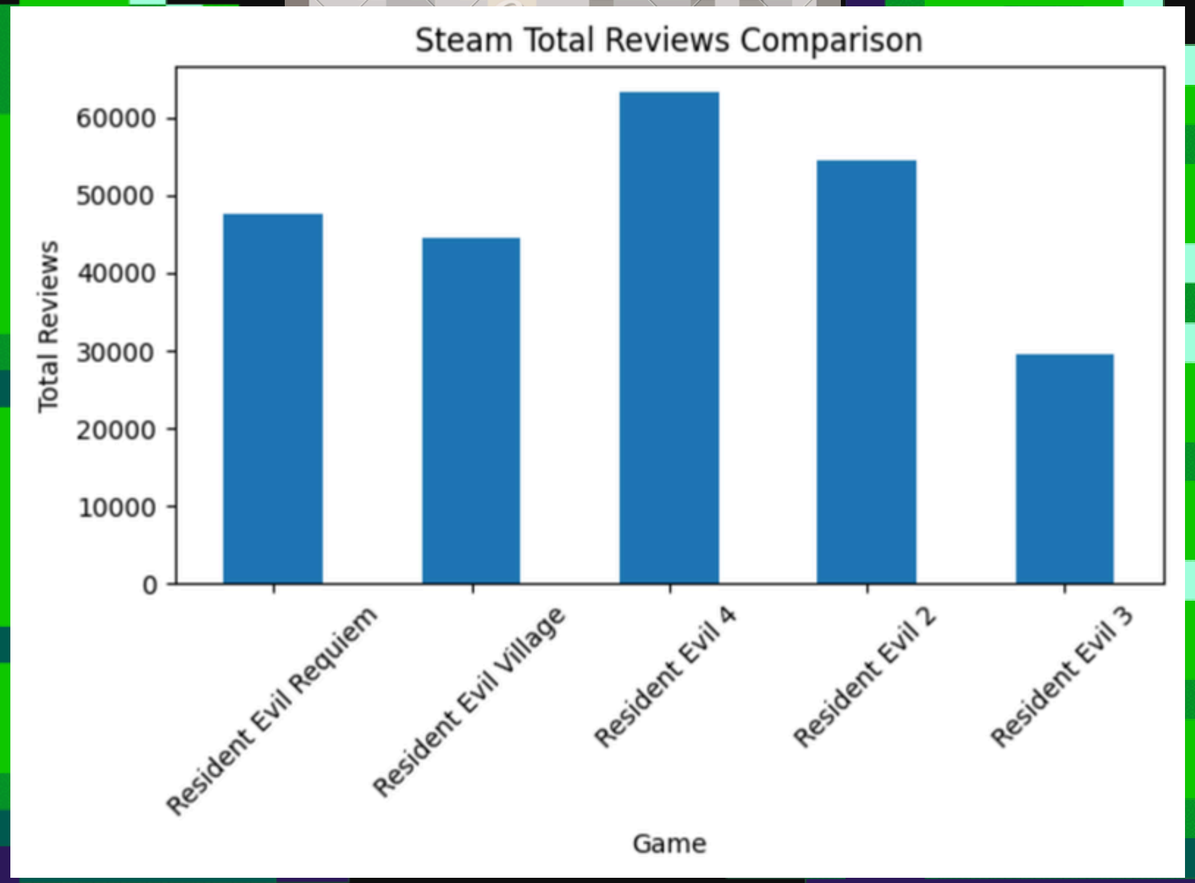
EARLY INTEREST

- OLDER TITLES (RESIDENT EVIL 4 & RESIDENT EVIL 2) HAVE A HIGHER AVERAGE EARLY SEARCH INTEREST.
- REQUIEM EXPERIENCED A RAPID SPIKE BUT DECLINED QUICKLY.

THERE IS A CLEAR DIFFERENCE BETWEEN SHORT-TERM HYPE AND SUSTAINED POPULARITY, WHICH IS WHY RESIDENT EVIL 4 & 2 BOTH BEAT RESIDENT EVIL REQUIEM.



STEAM TOTAL REVIEWS COMPARISON



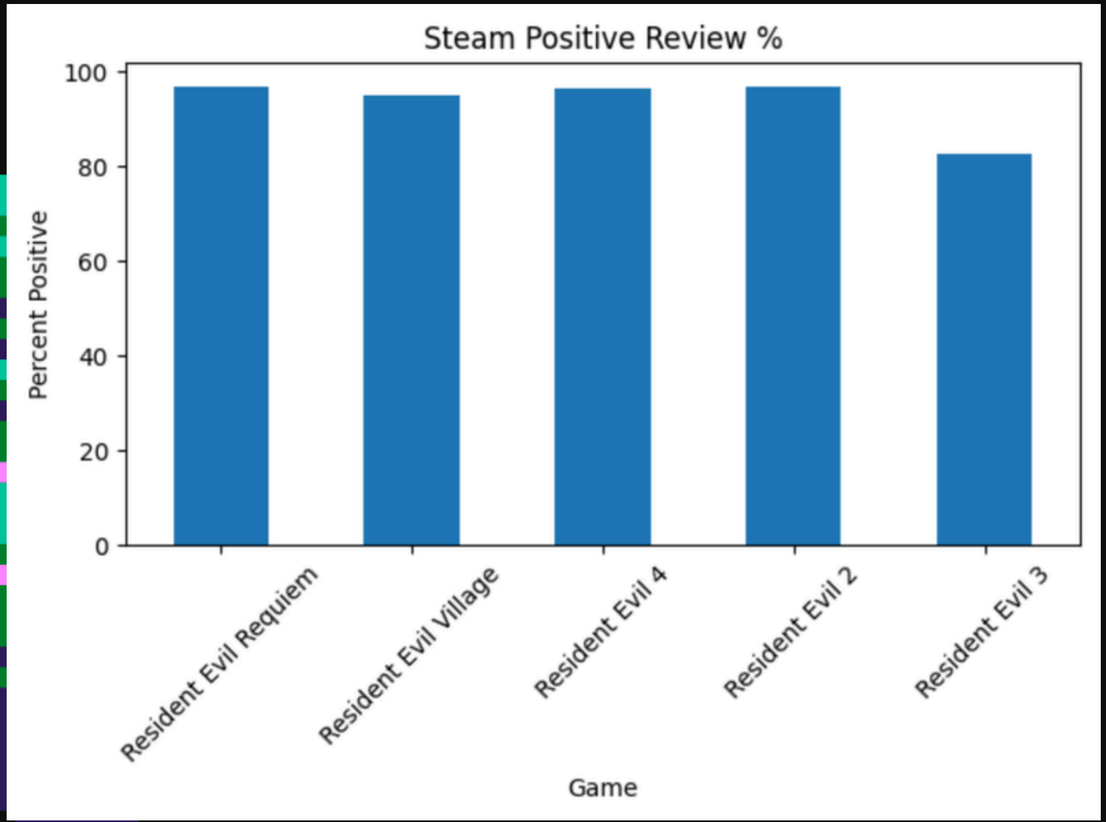
- LOOKING AT THE STEAM DATA, RESIDENT EVIL 4 AND RESIDENT EVIL 2 (OLDER GAMES) HAVE A HIGHER TOTAL REVIEW COUNT.
  - THIS IS EXPECTED AS THEY HAVE BEEN AVAILABLE LONGER, BUT IT ALSO REFLECTS LONG-TERM ENGAGEMENT.
- WITH REQUIEM HAVING THE THIRD LARGEST TOTAL REVIEWS ON STEAM AS A BRAND NEW GAME, IT SHOWS STRONG EARLY PLAYER ENGAGEMENT AND CONTINUED GROWTH.

THIS HIGHLIGHTS THE DIFFERENCE BETWEEN EARLY ATTENTION AND LONG-TERM PLAYER ENGAGEMENT.

STEAM POSITIVE REVIEW PERCENTAGE

- THE GAMES ARE CLEARLY WELL-LOVED AS ALL THE GAMES MAINTAINED A HIGH POSITIVE REVIEW COUNT!
  - WITH REQUIEM BEING NEWLY RELEASED AND HAVING A STRONG POSITIVE RATING, IT CAN BE INDICATED THAT IT IS WELL RECEIVED BY PLAYERS.

A STRONG INDICATION OF CONSISTENT, POSITIVE QUALITY THROUGHOUT THE FRANCHISE.



RESIDENT EVIL REQUIEM GENERATES THE STRONGEST INITIAL PUBLIC ATTENTION AS DISPLAYED THROUGH THE HIGHEST PEAK IN GOOGLE TRENDS.

OLDER TITLES (RESIDENT EVIL 2 & RESIDENT EVIL 4) HAVE A STRONGER SUSTAINED ENGAGEMENT, AS SHOWN THROUGH THE HIGHER AVERAGE SEARCH INTEREST AND TOTAL STEAM REVIEWS.

THE RESULTS SHOW A GAP BETWEEN INITIAL HYPE AND SUSTAINED ENGAGEMENT, EMPHASIZING THE IMPORTANCE OF COMBINING MULTIPLE DATA SOURCES.

KEY INSIGHTS

CHALLENGES

THE RECENT RELEASE OF RESIDENT EVIL REQUIEM LIMITS THE AVAILABILITY OF LONG-TERM DATA, MAKING IT DIFFICULT TO FULLY ANALYZE SUSTAINED PLAYER ENGAGEMENT AND LONG-TERM TRENDS.

INTEGRATING MULTIPLE DATA SOURCES, INCLUDING GOOGLE TRENDS AND STEAM DATA, REQUIRES HANDLING DIFFERENCES IN DATA STRUCTURE, FORMATTING, AND THE TYPE OF METRIC PROVIDED.

DIFFERENCES IN TIME SCALES BETWEEN GOOGLE TRENDS (SHORT-TERM SEARCH INTEREST) AND STEAM DATA (LONG-TERM PLAYER ACTIVITY) MADE DIRECT COMPARISONS MORE COMPLEX. FUTURE WORK INCLUDES EXPANDING THE DATASET TO LONGER TIMEFRAMES AND INCORPORATING ADDITIONAL ENGAGEMENT METRICS SUCH AS CONCURRENT PLAYERS.

THE END!

THANK YOU FOR LISTENING!
